Lips Healing process

Day 1

(right after procedure)
My lips feel a little
swollen and tight

Day 2

My lips are much darker and
still feel swollen & dry but
I don't feel pain.
Healing cream helps!

Day 3-4

The skin is flaking and
scabbing and the color
has faded substantially

Day 5-6

My lips feel almost
normal. The flaking
is almost gone

Day 7

My lips have completely
healed but the color is much
lighter than after the
procedure

After
touch-up

The color has come back nicely.
There are some uneven spots.
Time to schedule touch up
